

TIN TILES TODAY

The versatility and fire resistance of tin make it ideal for ceilings and backsplashes, however, it is the sheer WOW factor that makes tin tiles the go-to product for homeowners, DIYers, architects, decorators, and designers. Today, you'll find beautiful tin tiles everywhere, from kitchens, foyers, basements and accent walls, to bars, restaurants, and retail spaces, where they add a touch of elegance and class.

We invite you to browse through this catalog for design ideas. For even more inspiration please visit our online inspirations gallery at www.vintagepressedceilings.co.za - There you will find hundreds of beautiful photographs which capture a wide variety of tin pressed ceiling installations.

Please contact us to learn more about how easy and affordable it is to have the tin ceiling or tin project of your dreams.

MADE IN AMERICA

Vintage Pressed Ceilings has sourced authentic, genuine pressed tin tiles from an experienced producer in the industry. Made in the USA, from start to finish, everything is manufactured in Florida. This allows us to provide high-quality, American made products with the best pricing possible and outstanding customer service. Our pressed tiles are the real deal – .010 tin-plated steel. Don't settle for anything less than the best.

We currently supply over 40 patterns in 50+ colors. We are pleased to offer our affordable sample pack program which lets you choose the colors you are considering for your project. This enables you to view our remarkable product in your home before making your selection.

QUALITY WORTH FOLLOWING

AN AFFORDABLE WAY TO GET SPECTACULAR RESULTS

Vintage Pressed Ceilings makes it easy and affordable to create the tin project of your dreams. Both modern and nostalgic, tin has become a sought-after design element for various installations. Our tin pressed panels create spectacular results.

CEILING INSTALLATION

Tin Pressed Ceilings have begun a recent revival thanks to updated patterns & colour options that speak to the trends and aesthetics of today's consumer.

We offer three installation options; Nail-Up, Drop-In and our patented Snap-Lock™ system. To decide which installation option is right for you, call one of our expert Design Consultants on Sidney: +27 63 472 6750 or Ryan: +27 82 376 0844.

Nail-Up

Nail-Up panels are ideal for ceilings as well as vertical installations such as backsplashes, wainscoting, and walls. Panels can be applied directly over plywood or furring. Each panel has a ¼" nail-rail which allows for even spacing and easy installation. For backsplash or vertical application, panels can be simply adhered to the wall with construction adhesive.

Snap Lock™

Our patented Snap-Lock system is designed for use over any ceiling material including plaster, drywall or popcorn ceilings. The interlocking flange system screws directly into your surface, eliminating the need for furring strips. This installation is the number one option for renovation projects in homes with popcorn ceilings as no scraping is required!

Drop-In

For use in any 2' x 2' ceiling grid system, our Drop-In ceiling tiles fit all standard 2' x 2' grids with a 9/16" or 15/16" suspended grid system. For easy uniform installation, our flat recessed edges ensure each panel sits flush within the grid on all sides. If your current grid is 2' x 4' ask us about our T-bar conversion pieces.

Acoustical Drop-In

Designed with special auditory properties, our new extra microperforated Drop-In tiles offer superior sound performance by significantly reducing room echo. This unique feature is ideal for home theatres and basement installations. Available in most patterns, the sound absorbing holes are ultra-tiny to avoid compromising the beauty and style of the tiles.

DESIGN TIP: While any pattern is available for ceiling installations, for aesthetic reasons we suggest single pattern tiles for taller ceiling heights and smaller, repeat pattern tiles for shorter ceilings.

BACKSPLASH INSTALLATION

It's hard to imagine a faster, easier, or more affordable way to add beauty and sophistication to your kitchen, bar, bathroom or bedroom.

Designed to be as aesthetically pleasing as they are functional, tin backsplashes can protect your walls from all kinds of wear and tear. With our easy to install, durable, washable, and fire-resistant tin tiles it's entirely possible to go from bland to beautiful in just a few hours!

Our Nail-Up tiles make it easy and can be simply glued to your wall with construction adhesive. With over 50 colours to choose from we're sure you'll find just what you're looking for.

BACKSPLASH & WALL TRIM

All trim can be finished with the same industrial strength powder-coated and Artisan finishes to match your panels.

DESIGN TIP: We suggest 6" repeating patterns for backsplash applications, as the pattern allows you to cut the panel to accommodate space between your cabinets and countertops. (Suggested patterns: 3, 17, 19, 20, 21, 27, 30, 31, 35, 36, 37, 39, 40, F1, F2).

FREE DESIGN SERVICES & EXPERT HELP

We're happy to help you choose and customize your tin project with assistance in selecting patterns, colours, moldings and trim. We'll discuss what you like, what you need, and what you have questions about while exploring different ways to approach your project. We'll help create a plan just for you.

Drywall

WAINSCOTING & SPECIAL PROJECTS

For a unique design element when installing wainscoting and for inspired DIY projects, our "Nail-Up" tiles offer the greatest versatility and can be applied with construction adhesive.

With the ability to use construction adhesive rather than nails, these tiles are great for installing over drywall, wood and plywood. The "%" nail-rail" that runs around the perimeter of each panel ensures perfectly spaced overlap for quick and easy installation. Whether it's a wall covered in single or multi-patterned tiles for a dramatic statement, a traditional wainscoting application in a dining room or kitchen, a decorative accent to a cabinet or your favorite piece of furniture, such as a headboard or bookcase – Your imagination is your only limitation!

"We considered a typical wood wainscot, but wanted to use a more interesting material. We wanted something that would fit with the historical house, but maybe used in a different or unexpected way."

- Silvia S.

WE'LL HELP YOU GET THE JOB DONE RIGHT

We want you to be satisfied with your completed project. Our expert Design Consultants are just a phone call away, and our website is always available. We have a range of colour-matched switch plates (perfect for backsplash installations), an online inspiration gallery Vintage Pressed Ceilings has you covered. You can also request a DIY Installation brochure from our website.

PATTERNS

We have 40 patterns to choose from! We offer filler patterns for transitioning between full tile patterns and the outer perimeter of a ceiling application. In addition to the patterns shown, we also offer blank, non-pattern tiles for Drop-In installations. All tiles are nominally 24" x 24" square. Patterns are shown in Brushed Satin Nickel.

COLOURS

With over 50 colours to choose from it's easy to create the ceiling or project of your dreams. Mix and match patterns to bring added dramatic interest to your designs, or keep it simple and understated. It's entirely up to you! We have a wide variety of coordinating switch plate covers (perfect for wall or backsplash installations) to complement your panels.

ARTISAN FINISHES

Our Artisan finishes are the perfect choice for creating a dramatic and decorative statement in your room. These eye-catching color combinations enhance the natural beauty and pattern of each tile, creating a distinct and designer appeal. With our quality assured, multi-step process, each tile is powder coated, hand painted and distressed with precision care by skilled artists. Tiles are then sealed to ensure a lasting beauty.
